

WESLEY STREET

Owasso, OK (Tulsa metro) | wesley.street2016@gmail.com | linkedin.com/in/wesley-street | street-solutions.github.io

SUMMARY

Geospatial leader with 13+ years building, governing, and modernizing enterprise GIS across utility, energy, federal, and intelligence organizations. Currently Capability Lead for Systems and Architecture at Geographic Technologies Group, leading a team of 5 senior GIS analysts and developers. Strengths in ArcGIS Enterprise administration, enterprise geodatabase design and migration, Python automation, and data governance, with a track record of finding the business problems that GIS can solve and getting people to use the answer. 25 years of Army Reserve service, including three overseas deployments and more than a decade in squad leader and platoon sergeant positions.

CORE SKILLS

Leadership: Team building and hiring, staffing and workload planning, training and mentoring, cross-functional influence without positional authority

GIS Platforms: ArcGIS Enterprise (multi-portal, federated and non-federated servers, 500+ users), ArcGIS Pro, ArcGIS Online, Image Server, Experience Builder (including Developer Edition), Dashboards, Hub, Survey123, Field Maps, ArcGIS Monitor

Data: Enterprise geodatabase design and migration, SQL Server, Oracle, PostGIS, schema and metadata standards (SDSFIE), data governance, QA/QC process design, Data Management Plans

Development and Automation: Python, SQL, PowerShell, ArcGIS Notebooks, GDAL, JavaScript (basic), AI-assisted development (Claude Code), Esri deep learning (imagery and LiDAR classification)

Infrastructure: Server performance and capacity tuning, Splunk, SSL certificate lifecycle, VDI, Citrix, networking (LAN, VLAN, VPN)

Engineering Integration: PLS-CADD to GIS for transmission assets, CAD/BIM to GIS, 3D visualization of engineering designs

EXPERIENCE

Geographic Technologies Group - Remote

Capability Lead, Systems and Architecture | 09/2026-Present

- Lead a team of 5 senior GIS analysts and developers delivering enterprise geospatial assessments, modernization, and systems work; run weekly one-on-ones and a Monday team stand-up to clear roadblocks, advocate for staff, and forecast hours.
- Define the capability's service areas and skill coverage; plan and allocate staff hours, match project manager requests to the right people, and borrow capacity across teams to balance workload.
- Lead preliminary planning and scoping for client engagements, including reviews of existing enterprise GIS environments to plan upgrades, and review the team's work before it goes to clients.
- Deployed ArcGIS Experience Builder Developer Edition as a shared, URL-accessed development environment for a municipal client and set the working standards for outside contractors building in it.
- Developing customized ArcGIS Pro training for a client's GIS staff and building the standard virtual desktop (VDI) image for the company's GIS staff as it moves off high-performance physical workstations.

Senior Geospatial Analyst | 09/2025-09/2026

- Technical lead and primary author for current-state assessments and gap analyses of enterprise geospatial systems, documenting data models, infrastructure, and data flows and turning findings into prioritized modernization recommendations.
- Led an enterprise geodatabase modernization covering 500+ tables and 13,000+ attributes; interviewed stakeholders across departments to assess data relevance, standardize schema, and write the migration plan.
- Built Python tooling that automates geodatabase review and migration and reports on the downstream maps and applications affected when services change.
- Built a replacement enterprise data catalog that harvests data and metadata programmatically so users can find what data exists, where it lives, and how current it is.
- Migrated 30-40 web applications from ArcGIS Online to a federated Portal for a municipal client.

- Deployed Splunk and ArcGIS Monitor for centralized monitoring of ArcGIS Server and Portal, and tuned server capacity and configuration to stabilize platform performance.
- Applied deep learning models to Landsat imagery classification and evaluated LiDAR point-cloud classification for a client use case.

Street Solutions - Owasso, OK

Owner and IT Consultant | 04/2025-Present

- Run a small managed IT practice for churches and church plants: network design and deployment (LAN, VLAN, VPN), Google Workspace setup, and audio, video, and live stream systems, with training for volunteer staff.

US Army Corps of Engineers, Tulsa District - Tulsa, OK

GIS Analyst | 07/2024-09/2025

- Built and maintained the Commander's Dashboard and related web applications used in Congressional and senior leadership briefings.
- Technical advisor on a spatial viewer for the district's archaeological data built by an Army research lab team; recommended ending an approach heading toward a custom build several times over budget and steered a second team to a right-sized deployment.
- Integrated CAD engineering designs into GIS for a navigation system rehabilitation project, publishing 2D and 3D views for stakeholder review; developed mapping standards and templates for operations mapping.

Geospatial Data Manager and GIS Technical Lead | 11/2020-07/2024

- Led GIS technical operations for the district, owning the enterprise environment (3 portals, 500+ users), data standards, and high-visibility deliverables for senior leadership.
- Established district-wide GIS data standards compliant with Corps and DoD SDSFIE requirements and stood up an authoritative enterprise geodatabase shared through web services.
- Wrote Data Management Plans and statements of work, oversaw contractor geospatial work including a flood data migration, and launched a public ArcGIS Hub site.
- Managed ArcGIS Image Server for large raster and as-built datasets, standardizing imagery with GDAL; partnered with Esri on tailored training for the GIS team.

National Geospatial-Intelligence Agency - St. Louis, MO

Geospatial Analyst, assigned as Program Manager | 12/2017-11/2020

- As program manager for a critical analytic program (40+ analysts, 13 branches), single-handedly modernized it from spreadsheets and email to an automated Oracle and web GIS system, coordinating requirements with every branch that used its data.
- Directed and trained the feature extraction work of 25+ geographically dispersed analysts, building the training materials, attribution guidance, and validation process behind their data quality.
- Co-founded a Data Governance Council that set data integrity and quality policy, and designed standardized Oracle schemas for data sharing.
- Implemented a web services strategy that made datasets discoverable outside the primary system of record, preventing redundant copies and enabling change detection.
- Advocated for the division's geospatial analysts with senior executive leadership and founded and chaired a division Geospatial Roundtable as a forum for shared practices.

EASi Engineering, supporting AEP Transmission - Tulsa, OK

GIS Specialist; GIS Technician III | 08/2016-12/2017

- Filled an embedded GIS role within AEP Transmission engineering and grew GIS from a mapping service into an operational tool used by engineering, siting, and real estate.
- Built and supervised a GIS team that grew from 2 to 7, conducting hiring interviews, and took over personnel management of 2 transmission line engineers after their lead departed.
- Led the editors converting PLS-CADD transmission line data into authoritative enterprise GIS data for structures, conductors, insulators, and associated assets.
- Identified an unmet need in Real Estate and built right-of-way tracking that showed each tract's acquisition status on a shared dashboard, so project managers, land agents, siting, and engineering could sequence construction.

- Deployed Survey123 and Collector for disconnected field asset inventory and wrote the technical and user documentation for new workflows.

Samson Energy Company - Tulsa, OK

GIS Analyst | 01/2013-01/2016

- Wrote Python tools from scratch to generate 3D directional wellbore visualizations from drilling data at a geophysicist's request.
- Managed Oracle and SQL Server data and QA/QC for agreement mapping; tested third-party add-in builds and supported Citrix and license server upgrades.

MILITARY SERVICE

United States Army Reserve - Master Sergeant (E-8) | 01/2001-Present

- 25 years of service with more than a decade in squad leader and platoon sergeant positions, three overseas deployments (Iraq 2008, Afghanistan 2010-2011, Afghanistan 2019-2020), and consistent work alongside joint and multinational partners.

Joint Engineer Senior Sergeant, U.S. Forces Korea Engineers | 07/2023-Present

- Manage personnel support for 20-40 augmenting reservists per exercise, from junior enlisted to lieutenant colonel and from every service branch: billeting, transportation, shift coverage, and workstations ready on arrival.
- Assist with engineer operational planning, provide relief in the Joint Operations Center, and condense after action reviews into lessons learned for future rotations.

Senior Geospatial Engineer Sergeant, National Geospatial-Intelligence Agency | 08/2020-07/2023

- Senior NCO for reserve geospatial support, leading local analysts and serving as primary validator of feature extraction for a combined civilian and military team.

Headquarters Platoon Sergeant and Operations Chief, Afghanistan | 05/2019-10/2020

- Led a headquarters platoon of about 30 and ran headquarters operations for a 90-100 person engineer company providing security around Bagram Air Base alongside Czech, Georgian, and Polish forces.
- Shared company operational planning with the executive officer; led a small intelligence cell that assessed routes for platoon leadership and re-extracted roads and hazards into GIS so soldiers could view routes on tablets.
- Managed billeting, facilities, flightline operations, and personnel movement across the theater for the company.

Squad Leader, Route and Area Clearance | 2009-2014, 2017-2019

- Led an 8-soldier route clearance squad in Helmand Province, Afghanistan (2010-2011), supporting British-led Task Force Helmand and Marine-led Task Force Leatherneck.
- Army Achievement Medal for planning and execution; Distinguished Honor Graduate, Advanced Leader Course.

Squad Leader, Heavy Construction | 2003-2009

- Supervised construction projects across Baghdad, Iraq (2008), often in charge of half-platoon detachments for 3-4 weeks at a time rebuilding landing zones, entry control points, and other infrastructure.

EDUCATION AND CERTIFICATIONS

Missouri State University - Springfield, MO

- Bachelor of Science, Geospatial Science (2012)
- Undergraduate Certificate, Geographic Information Systems (2012)
- Graduate Certificate, Homeland Security and Defense (2017)

University of Wisconsin-Madison

- Graduate coursework, Cartography and GIS

Certifications

- GIS Professional (GISP), GIS Certification Institute (2017)
- Certified Mapping Scientist, GIS/LIS, ASPRS (2022)
- GEOINT Professional Certification (DoD): Fundamentals (2019), Geospatial Analysis Level II (2022), Geospatial Data Management Level II (2022)
- CompTIA Security+ (2021)
